The Monkey Bars Garage Storage System concept is to separate "long term storage" (boxes and totes) from items used more often. The Monkey Bar wall mounted shelf is designed to utilize wasted overhead space and holds 1,000 lbs. every 4 feet of shelf. In combination with the shelf is a rack system that utilizes the shelf braces to incrementally insert "Monkey Bars" and nine hooks to accommodate hanging just about anything. No other rack system on the market can layer hanging items, with hooks that can simply be placed on a bar, slide side to side, and hang both forward and backward. Monkey Bars systems are installed and organized by trained dealers who are located in many locations throughout the USA.
