

NAPO has developed a **Green Task Force** to help in moving the Annual Conference towards going green and to assist in other green initiatives. Below are some of the things NAPO is doing to go green now, what NAPO is planning on for the future and what you can do to help.

NAPO Annual Conference going green.....

1. Evaluations will be completed via an on-line system rather than using a paper process.
2. NAPO Conference Attendee list will be offered on-line both pre and post conference rather than in paper form.
3. The NAPO Annual Meeting registration brochure and final program book is printed on recycled paper.
4. Minimizing the need to print 'single use' signs.
5. Recycle badge holders and lanyards.
6. Work with the hotel to recycle as much as possible.
7. Work with Exhibitors to reduce waste of promotional items.

NAPO Future Green thoughts.....

1. Electronic promotional emails and brochure. No paper mailings. By doing this it will reduce paper waste and save on postage.
2. CD version of Annual Conference Final Program Book.

What YOU can do to help.....

1. Consider traveling with one or more NAPO members from your area to share in the ride to/from the airport and hotel. If driving, consider car-pooling.
2. Bring reusable water bottles and fill up on-site.
